Profile

Full Stack Developer (MERN) with a proven track record of architecting and deploying enterprise-level web applications from scratch. Experienced in working directly with founders to translate business needs into scalable technical solutions. Passionate about AI integration and high-performance frontend design.

Work Experience

Kreative Werbung Lab

Jan 2026 to Present

Web Developer Intern

- Design and work on the architecture, development, and maintenance of websites and web applications
- Improve development workflows and support smooth CI/CD processes
- Deploy, monitor, and manage production servers, ensuring system stability and performance
- Gain hands-on experience with modern frameworks and tools such as Next.js, React, Prisma, Express, PostgreSQL, and Vitest
- Work with Docker, Portainer, and server monitoring tools like Prometheus and Grafana

SaaviGenAI

Nov 2025 to Jan 2026

Full Stack Developer Intern

- Architected and deployed the official enterprise website (saavigen.ai) using the MERN stack.
- Built a custom Admin CMS and integrated secure JWT authentication and Cloudinary for media management.
- Managed production deployment on Hostinger via Nginx and boosted search visibility through meta-tag optimization.
- Collaborated directly with the founder to define technical roadmaps and implement scalable MongoDB architectures.

CSRBOX (IBM Collaboration)

June 2024 to Aug 2024

Web Developer Intern

- Collaborated on enterprise-level web projects, adhering to industry-standard coding practices and Git flow.
- Designed UI/UX for food redistribution management system
- Implemented role-based authentication system for food redistribution management system

Education

Bachelor of Technology (CSE) - 8.5

2022 to 2026

Maharshi Dayanand University Rohtak

Projects

Medical Assistant Application (MERN Stack) [↗](#)

- Built an AI-powered healthcare application featuring chatbot with voice and vision capabilities
- Integrated hospital finder functionality, mood logging system, and interactive health insights
- Implemented secure authentication/authorization protocols for patient data protection

Social Media Website (React and Firebase) [↗](#)

- Built a full-stack social media platform with user authentication, post creation, and interaction features
- Designed responsive UI/UX with focus on intuitive user experience across multiple devices

Skills

- Frontend: React.js, JavaScript, HTML, CSS, Tailwind, Shaden
- Backend: Node.js, Express.js, MongoDB, Webhook, Sharding
- Tools & Technologies: RESTful APIs, JWT, Swagger, WebSocket, OAuth, Git, Git flow
- Other: Strong problem-solving, debugging, 3rd party service integration
